

Ganotec-Nuvumiut
a Partnership

WHO WE ARE

For over 15 years Ganotec has been a leader in the aboveground storage tank industry. We have designed and built aboveground storage tanks for the refining, power, terminal, petrochemical, chemical, gas, LNG, pulp and paper, food and beverage, water, wastewater and transportation industries.

FABRICATION SERVICES

At Ganotec, all of your tank work is performed in-house to assure your schedules and quality expectations are met. Ganotec tank experts handle every facet of your project from, engineering, material procurement through fabrication to installation and commissioning.

Because we provide single-point responsibility, our customers don't have to worry about the duplication of effort, delays and design incompatibilities that can arise when multiple contractors are involved.

We provide the complete package of tank repair and maintenance services, including bottom replacements, shell repairs, fixed and floating roof repairs and replacements, tank re-leveling, fittings and appurtenances, special design and engineering work, as well specialty fabrication and construction project work for:

- Tank Bottom Replacements
- Floating Roof Drain Systems
- Cone Roof & Structure Repair & Replacements
- Sunken or Collapsed Floating Roof Repairs
- Stairways, Handrails, & Platforms
- Out-of Round or Buckled Tank Shell Repairs
- Primary & Secondary Seals / Floating Roof Tanks
- Floating Roof Tank Conversions
- Geodesic Dome Installations
- Internal & External Floating Roof Inst. & Repairs
- Shell Nozzles, Manways & Appurtenances
- Tank Seal Inspection & Repairs
- Rolling Ladders and Stair Treads
- Tank Jacking & Leveling
- Tank Foundations
- Cathodic Protection & Leak Detection
- Secondary Containment & Leak Detection
- Shell Repair & Replacement
- Roof Drain Systems
- Demolition & Removal
- Fire Protection Systems

Ganotec is versed in every aspect of American Petroleum Institute (API) standards and ASME code work in both atmospheric and pressure storage vessels. Ganotec constructs and inspects tanks to the following standards:

- API Standards 650 & 620
- AWWA D100
- ASME Section #9
- Standard 653
- API Standard 570
- API Standard 510
- and STI Standard SP001

QUALITY & SAFETY

Ganotec operates under the standards of a quality management system certified to ISO 9001. Our technical team members are experts in translating conceptual designs into working drawings that consider safety and quality issues as an integral part of a successful completed tank project.

Over the years, we developed a reputation for quality, safety and reliability. We've built our client relationships on years of trust, open communication, and a mutual desire to complete projects safely and with a high degree of quality. Our reputation has resulted in repeat business with existing clients. This continuing commitment to quality is a source of tremendous pride for everyone at Ganotec.

As an optional service, Ganotec offer our Total Tank Management program, which includes everything from tank inspections and cleaning, to environmental assessment reviews, repairs and modifications. This program allows our customers to concentrate on their core business while Ganotec manages all tank related activities, providing cost-effective maintenance and regulatory compliance.
